PROFILE

Motivated Software Engineering student with skills in HTML, CSS, JavaScript, React, Python, MySQL, C++, and Figma. Experienced in developing responsive web applications, designing intuitive user interfaces, and managing databases. Passionate about software development, problem-solving, and continuous learning, with a strong desire to gain industry experience and contribute to real-world projects.

PROJECTS & EXPERIENCE

Online Donation Management System

- Developed a responsive donation website using HTML, CSS, JavaScript, and React.
- • Designed user-friendly interfaces and wireframes using Figma.
- • Implemented interactive features to improve user experience.
- • Tested and debugged website functionality across different devices.

Database Management Project

- • Designed and managed relational databases using MySQL.
- • Created tables, relationships, and SQL queries.
- • Performed CRUD operations and data validation.
- • Improved database organization and data retrieval efficiency.

Web Development Projects

- • Built multiple front-end web applications using HTML, CSS, and JavaScript.
- • Developed responsive layouts for desktop and mobile devices.
- • Applied modern web design principles and best practices.
- • Collaborated with classmates on academic software projects.

EDUCATION
